

## Exhibitor

Systems Integration & Development, Inc. (SID), is an established information technology solutions provider to Federal and commercial customers. Our solutions and services focus on operational continuity, mission support and system reliability. We have successfully supported our customers in the areas of Systems Engineering, Satellite Ground Systems, Application Services, Infrastructure Management, Big Data & Analytics, and Information Security. SID continues to support NOAA to ensure integrity of operational systems that deliver data through the GOES Data Collection System (GOES DCS) and to develop new technologies and procedures to improve data collection and delivery. SID is providing specialized Engineering and Subject Matter Expertise to NOAA's Integrated Dissemination Program (IDP) to support the GOES-R Rebroadcast and to support the re-architecture of the NOAA national Weather Service (NWS) Telecommunications Gateway system. Our Infrastructure support to NESDIS's Center for Satellite Applications and Research (STAR) ensures continuing support of NESDIS mission programs. SID's success is driven by our focus on comprehensive quality management derived from our quality credentials that include SEI-CMMI Level 2, ISO 9001:2008, and ISO 20000-1:2011. We collaborate with our customers to understand mission requirements and provide tailored program controls to ensure performance transparency, accountability and repeatable processes and methodologies.
